EDUCATION

- Thapar Institute of Engineering & Technology** (Current CGPA: 9.42) Patiala, Punjab, India
Bachelor of Technology in Computer Science Engineering July 2025 – May 2028
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Web Development, Database Management Systems
- Diploma in Computer Science Engineering** Graduated 2025
Thapar Polytechnic College
- Completed comprehensive program covering programming fundamentals, web technologies, and software development practices

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript, HTML5, Tailwind CSS
Frameworks & Libraries: React.js, Node.js, Express.js
Developer Tools: Git, GitHub, VS Code, Postman
Databases: MongoDB, SQL
Core Competencies: Full-Stack Development, Machine Learning, Object-Oriented Programming in C++, DBMS, Operating System, Responsive Web Design, Data Structures & Algorithms, REST APIs

PROJECTS

- AI Interview** | *React.js, Node.js, Express.js, MongoDB, JWT, OpenRouter API, Razorpay* | [GitHub](#) 2026
- Built an AI-powered mock interview platform using MERN stack that analyzes uploaded resumes and generates personalized technical interview questions based on projects, skills and experience
 - Implemented JWT authentication, AI-based answer evaluation, speech recognition, countdown timers, and tab-switch detection to simulate real interview environments.
 - Integrated Razorpay payment gateway, REST APIs, and responsive UI to provide an end-to-end interview preparation experience.
- Imagify -Image Generation Platform** | *React.js, Node.js, Express.js, MongoDB, Stripe API, AI Image API* | [GitHub](#) 2025
- Developed full-stack AI-powered image generation platform with complete MERN authentication system, enabling users to create custom images from text prompts using advanced AI models
 - Integrated third-party AI image generation API with prompt optimization engine, delivering high-quality images with automatic download functionality and gallery management
 - Built responsive user interfaces with React and Tailwind CSS, including pricing plans, credit management, and intuitive prompt workflows.
- AQI Prediction System** | *Python, Scikit-learn, Pandas, NumPy, Matplotlib* | [GitHub](#) 2025
- Developed a machine learning model to predict Air Quality Index (AQI) using environmental parameters including PM2.5, PM10, CO, NO2, and SO2.
 - Preprocessed real-world datasets by handling missing values, removing outliers, performing feature engineering, and data normalization.
 - Trained and evaluated a Random Forest Regression model using R² Score, MAE, and RMSE to measure prediction accuracy Achieved an R² score of 0.76 with MAE of 13 and RMSE of 18.

ACHIEVEMENTS & EXTRACURRICULAR

Hackathon Achievement: Secured 3rd place in Internal Hackathon during Diploma (2nd year) for developing innovative web-based solution

Competitive Programming: Solved 100+ DSA problems on LeetCode covering Graphs, Trees, Linked List

Self-Learning: Built 3+ full-stack projects and 1 Machine Learning independently within 1 year of learning MERN stack and Machine Learning
